BLÜCHER

EuroPipe®

DRAINAGE PIPES AND FITTINGS

Installed for a multitude of uses including downpipes, industrial/commercial drainage to sink features, the EuroPipe Range is designed with reliability, durability and fast installation in mind with 316L stainless steel.

A wide range of pipe and fittings are available in 50mm to 160mm diameters, and lengths from 150mm to 6 metres. The choice is made simple for quick installation, demanding requirements or aesthetic value by the BLUCHER EuroPipe Range.

Using the push-fit system
reduces the time for installation,

saving you time and money

BLÜCHER

Industrial®

FLOOR DRAINS

The BLUCHER Industrial Drain Range has been developed for the specific applications where demanding loads and high flows are required. With a range of grates and accessories available, there is an Industrial Drain suitable for a multitude of installations.

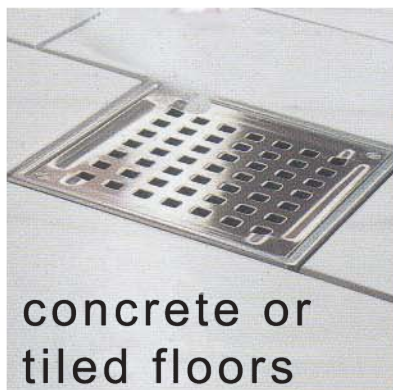

The advantage of the Industrial Drain Range is the high standard that it performs in hygiene sensitive, corrosive environments and

in demanding situations

BLÜCHER

Domestic®

FLOOR DRAINS

concrete or
tiled floors

creating a better look

for wet areas, the BLUCHER range of Domestic Floor Drains

have been designed to create a product that not only looks great but with the inherent long term benefits of high quality corrosion resistant stainless steel.

Designed to suit many floor types, the adjustable head, tilt and height adjustable features and the ability to connect to most pipes, including PVC, places this range of drains above the rest.

mapress pressfitting system

The Mapress stainless steel pressfitting system is designed for high pressure applications with the features of hygiene, reliability, safety and fast installation in mind.

Available in sizes from 15 to 108mm in diameter, the high quality 316 grade stainless steel system can be used for water supply, compressed air and other fluids whilst withstanding high temperatures and pressures with ease.

Connections between pipe and fittings are crimped in under seven seconds, taking the hassle out of installation; no welding means no fire risk. Delivering a quick, simple and effective system,

Mapress is **the ultimate in high pressure pipe systems**
